## Orascom Construction Consortium to Develop 900 MW Build-Own-Operate Wind Farm in Egypt

Orascom Construction PLC (ADX and EGX: ORAS) announces that it has signed, in a consortium with Aeolus and ENGIE, a Power Purchase Agreement (PPA) with the Egyptian Electricity Transmission Company (EETC) for the development of a 900 MW wind farm near Ras Shokeir in the Gulf of Suez, Egypt.

The wind farm will be developed under a 25-year Build-Own-Operate (BOO) model by a consortium comprising Orascom Construction (25%), Aeolus (40%), an African renewable energy IPP platform of Toyota Tsusho Corporation, and ENGIE (35%), a major player in the energy transition.

Orascom Construction will also execute all civil and electrical works for the balance of plant, in addition to supplying certain local components.

Following this milestone, the project will progress towards financial close, which is expected by early Q3 2026.

This project marks the consortium's third wind farm, building on two operational BOO wind farms with a total capacity of 912.5 MW, both completed ahead of schedule.

The project will also increase Orascom Construction's wind power capacity to 1.8 GW and further expand the Group's concessions portfolio, which currently includes renewable energy, water, and logistics across Egypt, the UAE, and Saudi Arabia.

### About Orascom Construction PLC

Orascom Construction PLC (ADX and EGX: ORAS) is a leading global engineering and construction contractor with a longstanding track record of delivering large-scale, complex infrastructure, industrial, and commercial projects across the Middle East, Africa, and the United States. Orascom Construction also develops and invests in concessions, owns 50% of BESIX Group, and holds a building materials, facility management and equipment services portfolio. The Group has consistently ranked among the world's top contractors and is dual listed on the Abu Dhabi Securities Exchange (ADX) and the Egyptian Exchange (EGX).
